1. Message from the Managing Trustee

"Completing over a decade of community transformation across Northern Maharashtra has reinforced our foundational conviction: sustainable social change happens when marginalized communities become active partners rather than passive recipients. In FY 2024-25, our mobile clinics traversed more than 36,000 kilometers across rugged tribal terrain, providing primary maternal and pediatric care to families who had never previously seen a physician. As we embark on renewable energy and climate-smart agriculture initiatives such as PM-KUSUM solarization, our commitment to financial transparency and audited impact remains absolute."

— **Sunita Deshmukh**, Managing Trustee

2. Strategic Pillars & Programmatic Achievements in FY25

Pillar A: Community Health & Maternal Care ('Project Aarogya Vardhini')

Operating 4 customized Mobile Medical Units (MMUs) equipped with diagnostic blood analyzers, ultrasound, and emergency obstetric kits. Across 42 remote tribal hamlets in Trimbakeshwar and Surgana talukas, the team conducted 240 village medical camps, examining **18,540 patients**. Maternal health monitoring ensured 1,420 pregnant women received antenatal checkups, achieving a **98.4% institutional delivery rate** (up from 64% baseline).

Pillar B: Foundational Literacy & Tribal Education ('Project Gyan Deep')

Running 32 Community Learning Centers (Balwadis) catering to **1,280 tribal children**. Distributed bilingual Foundational Literacy and Numeracy (FLN) kits, established 14 village libraries, and served 85,000 fortified nutritional meals combating severe acute malnutrition.

Pillar C: Women's Economic Empowerment & Dairy Cooperatives ('Project Samriddhi')

Mobilized 45 Women Self-Help Groups (SHGs) comprising 520 marginalized women. Facilitated **₹ 48.5 Lakhs** in credit linkage through nationalized banks for dairy cattle procurement and organic millet processing, maintaining a flawless **100% repayment record**.

Pillar D: Water Harvesting & Solar Agriculture ('Project Jal & Urja Setu')

Constructed 14 earthen check dams and de-silted 8 community percolation tanks, recharging 45 open wells. Conducted renewable energy and solar irrigation awareness sessions in 50 agrarian villages, paving the way for PM-KUSUM solar pump adoption.
